Re: Draft EIR GP03-05-10, PDC03-093 for Regional Medical Center Expansion Project

Mr. Buikema,

On behalf of the Campus Community Association, I am writing to request that the final referenced EIR approval be delayed to at least 1 November 2004 pending the resolution of ongoing studies. These include:

- Air Quality. A comprehensive transportation plan review utilizing automobile, light rail and other transportation modes.
- Flight Path. Noise and traffic safety impacts from helipad operations.
- Traffic Safety. Ambulance traffic and routing with respect to residential neighborhoods.
- Growth Management. Direct and consequential development including professional offices and services and other commercial support business and the impact on residential realty.
- Regional Services. Completion of the San Jose Medical Center closure study scheduled for publication on 1 November 2004.

It is our organization's position that these items have yet to be adequately addressed. We believe that continuing this review until 1 November 2004 is necessary to the resolution of these important issues.

Sincerely,

David Erickson  
President, Campus Community Association
